

## Ten Principles of Water

1. Water belongs to the earth and to all species.
2. Water should be left where it is whenever possible.
3. Water must be conserved for all time.
4. Polluted water must be reclaimed.
5. Water is best protected in natural watersheds.
6. Water is a public trust, to be guarded by all levels of government.
7. Access to an adequate supply of clean water is a basic human right.
8. The best advocates for water are local communities and citizens.
9. The public must participate as an equal partner with government to protect water.
10. Economic globalization policies are not water-sustainable.
