Immunization and Medication Policy

In terms of addressing medical questions and/or concerns regarding need for immunizations and medications for travelers, all travelers are expected to comply with the CDC recommendations for travel to Nicaragua.

Details can be found at www.cdc.gov/travelers/destinations/nicaragua.html and should be shared with your health care practitioner.

The North Country Mission of Hope understands that individuals traveling have the option to not follow the recommendations. However, at the same time, The North Country Mission of Hope is unwilling to accept the potential risk for others and liability for such a decision by anyone traveling with our group. Therefore the only exclusion would be for medical reasons documented in a letter signed by your physician.

These requirements apply to malaria medications as well as immunizations. The expectation is that all travelers are taking medication to prevent infection from malaria. There are multiple medications and any are acceptable. Please refer to the site and list above referenced.

Should you have difficulty getting the appropriate coverage please consult Industrial Medicine 220 Tom Miller Road 518-562-2009.

I have read, understand, and am in compliance with Mission Of Hope Policy:

Signature: _____

Signature of Parent/Guardian for anyone under age 18: _____
